

PRESS RELEASE

Morgan Radford joins Virox Animal Health

June 15, 2016

Oakville, ON – Virox Technologies Inc. is pleased to announce that Morgan Radford, BSc (Agr) has joined the Virox Animal Health division as Manager, Professional and Technical Services. In this role Ms. Radford will be the technical resource expert for Virox Animal Health helping to build the Professional and Technical Services® (PTS®) team as experts in infection control and biosecurity for the livestock and poultry market. Ms. Radford will serve as a biosecurity resource for Virox Animal Health and the animal health industry to assist with the improvement of cleaning and disinfection through the development of science-based best practices.

Ms. Radford graduated from the Bachelor of Science (Agriculture) program at the University of Guelph after majoring in Animal Science. She brings a wealth of knowledge to Virox Animal Health from her roles as Technical Issues Analyst with the Canadian Pork Council (CPC), Associate Executive Director with the Canadian Swine Health Board (CSHB) and On-Farm Program Lead with the Ontario Sheep Marketing Agency (OSMA). Some key highlights of Ms. Radford's career include fast-tracking vaccine access during emerging health crisis, development of an emergency preparedness plan including the hog industry's response to Pandemic H1N1 and representation of the swine industry on numerous working groups and advisory committees.

“Our human health team has become known across North America as experts in chemical disinfection for infection prevention” said Nicole Kenny, Senior Director Professional and Technical Services, Virox Technologies Inc. “We want to develop the same level of expertise and become the biosecurity resource to our customers and the animal health market in general. The expertise that Morgan brings to the Virox Animal Health team is a key step in delivering on that goal.”

Virox Animal Health is a division of Virox Technologies Inc, a research-driven company whose mission is to equip the entire spectrum of global markets that are concerned with infection prevention and biosecurity with the state-of-the-art, patented Accelerated Hydrogen Peroxide® (AHP®) technology.
