

What is INTERvention[®]?

Intervention[™] is powered by Accelerated Hydrogen Peroxide[®] (AHP[®]), a **CLEANER, FASTER, RESPONSIBLE, SUSTAINABLE, and COMPATIBLE** disinfectant technology.

Why Choose Intervention[™]?

Improve productivity and compliance

- Superior health and safety rating requires no PPE at in use solutions[§]
- Works faster with **½ the contact time** of competitive chemistries
- Superior foaming

Protect investments and assets

- Compatible with a wide range of materials
- Non-corrosive

Increase confidence with a validated technology

- Proven efficacy against a broad-spectrum of pathogens such as PEDv, PRRS, Avian Influenza, Equine Influenza, BVDV^{*}
- Peer reviewed studies supporting the use of AHP[®] in high soil load environments including studies from Michigan State University, Iowa State University, and Colorado State University^Δ

How to Use INTERvention[®] for Transport Vehicles

1 Mix

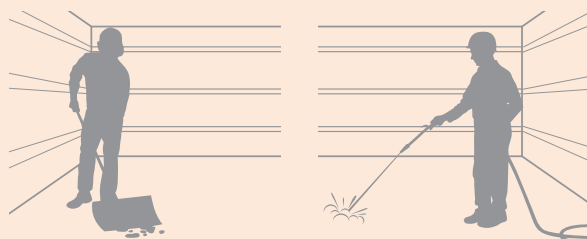

- Dilute Intervention[™] Concentrate to the desired concentration
- Using Precise[™] AHP4.25 Test Strips, test the diluted solution to confirm the correct concentration upon initial dilution system set up. Periodic testing is recommended[¶]
- For cold weather protocols, please visit ViroxAnimalHealth.com

SELECT YOUR DILUTION [†]			ADD INTERVENTION [™] CONCENTRATE	ADD WATER
1:16	Disinfection	5 Mins	8 oz	1 Gallon
1:64	Virucidal	5 Mins	2 oz	1 Gallon
	Sanitizing of Bacteria	3 Mins		
1:128	Sanitizing/Cleaning	3 Mins/ N/A	1 oz	1 Gallon

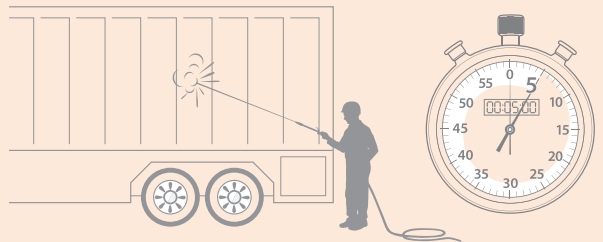

2 Clean

- Scrape out organic matter
- Wash using a cleaner (such as 1oz of Intervention[™] Concentrate per 1 gallon of water)
- Rinse
- Inspect if visible soil is present. If yes, repeat Steps A-C

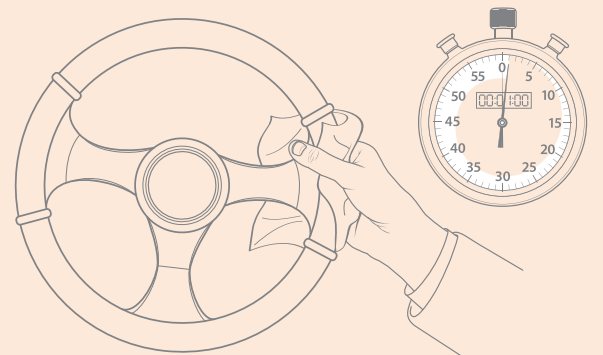

3 Apply Disinfectant

- Disinfect interior and exterior of trailer
- Disinfect exterior of cab
- Wait 5 Minutes^{*}

4 Disinfect Cab with Intervention[™] Wipes

- Disinfect any surfaces that the driver has touched or handled, including pedals
- Wait 1 Minute^{*}

^{*} Refer to reference sheet for additional claims and use instructions.

^Δ Visit ViroxAnimalHealth.com Peer Reviewed Studies for a full list of studies validating AHP's effectiveness.

[§] Carries lowest toxicity rating (category IV) given by the EPA – Staff aren't afraid to use it.

[¶] Confirmatory Testing policies should be determined by your facility for frequency. Using dilution control systems reduces the risk for inaccurate dilutions.

[†] 10 minute contact time for disinfection of Bacteria at a 1:64 dilution.
